

TOP-NOTCH CREATIVE *recipe*

the method:

In a large pot, place a college grad seasoned with a passion for digital as well as traditional design. Add in an array of freshly picked skill-sets and bring to a boil. After 10 minutes, reduce heat and stir in a wide variety of clients and types of industries served. At this point, sprinkle in a pinch of sarcasm, a dab of humor, then cover and simmer slowly over the course of 15 years, while periodically adding a splash of Guinness and the occasional industry award. Served hot or cold, this recipe pairs well with any project, team or environment.

If you'd like to try this particular recipe and would rather not have to go through all the hassle, then simply call me and we'll create top-notch creative together instead.
